

1. Using the "Line" tool draw a simple line similar to that in the viewport.

2. Apply the "Lath" modifier and set the parameters as needed.

**Make an axle the same way but begin in the Left Viewport.**

**Always make the 3D Max work for you; why do the same thing three more times when you can have 3D Max “Clone” your work.**

**1. Select your Tire, Rim, and Axle.**

**2. Open the “Mirror” tool and “Copy”.**
