

Dinosaur Eyes and Lids

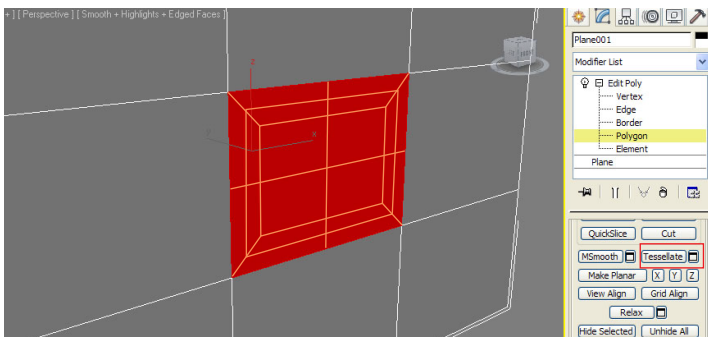

Eyelids are an important detail when creating a realistic dinosaur.

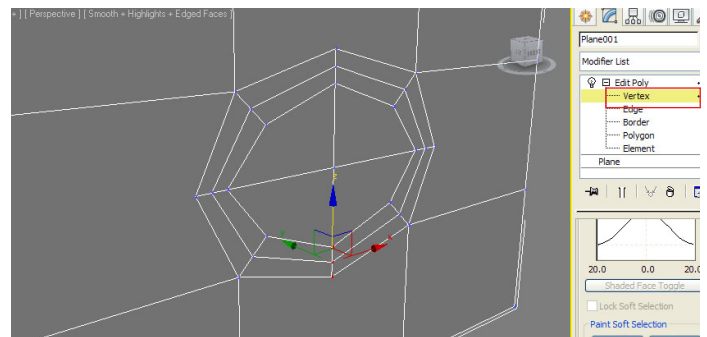

1. Select a polygon.

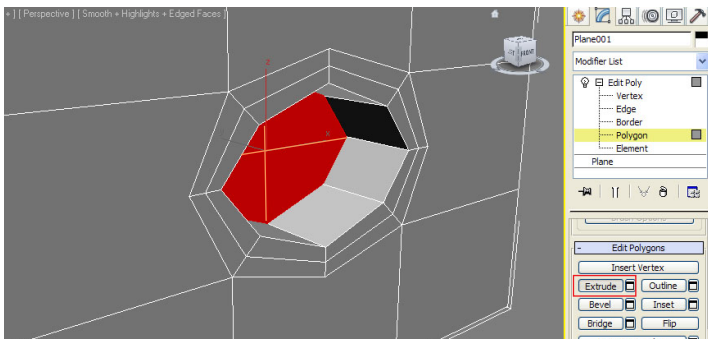

2. "Inset" the polygon.

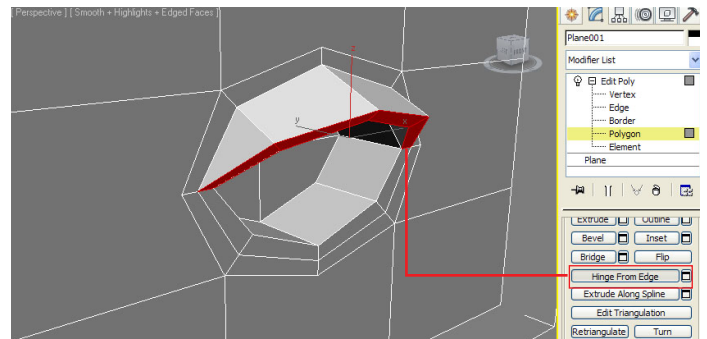

3. Select the 5 polygons and "Tessellate" them.

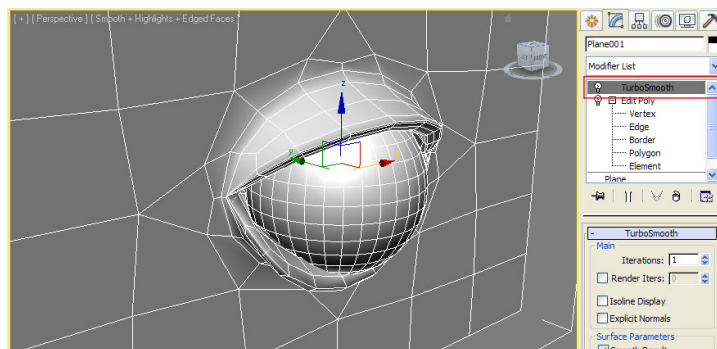

4. Adjust the vertices to form an oval like shape.

5. Select the 4 inner polygons and extrude inward.

6. Select the 4 polygons around the rim and "Hinge" to form the lid

7. Create the bottom lid, make a sphere and add TurboSmooth.
