

Now you can begin to set up the Viewport Canvas

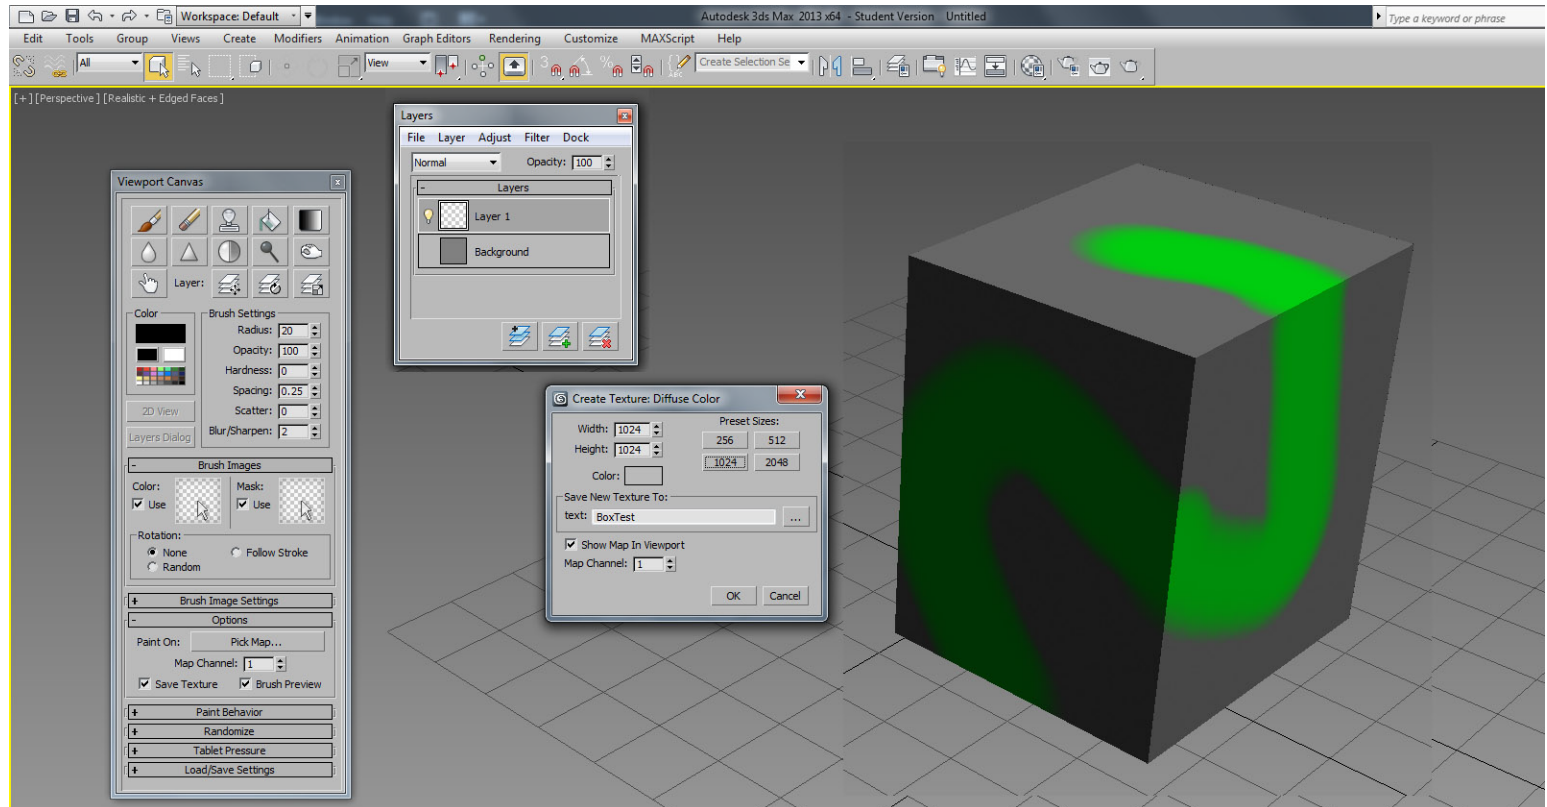

1. The Viewport Canvas box is located on the “Tools” menu.

2. Select the “Brush”
& then select
“Diffuse”.

Next, click 1024 x
1024, type in a name
and save it to your
folder as a JPEG.

Close the dialog box.

3. In the “Layer” panel choose “Add Layer”.

4. Return to the Brush. Select a color and paint.

The Viewport Canvas paint set is similar to the one in PhotoShop. You can control brush size, set layers and and layer effects. Spend some time experimenting.
