

3D CHARACTER DESIGN

Next you will add keys to the visibility track and adjust the rate of visibility.

5. Select the "Visibility Track": You will see the actual track on the graph, above the "0" level, as a faintly dotted line.

6. Select the "Add Key Tool".

7. Place "2" keys on the visibility track. Move the first key under the "0" line.

8. Leave the second key at the "1" level, this is total visibility.
