

## 3D Modeling & Animation

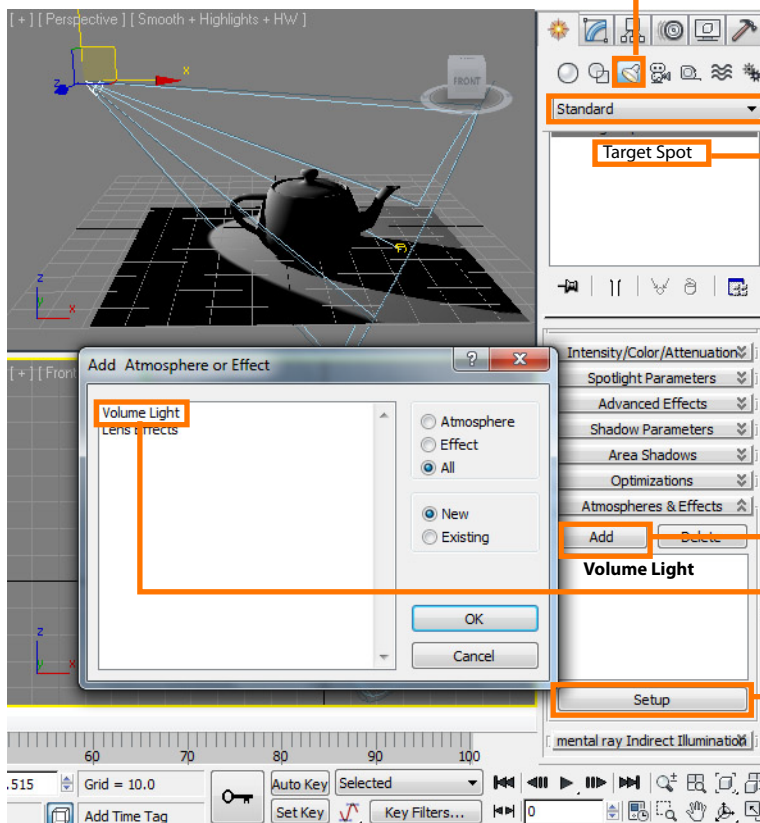

# Creating Volume Lights

**Volume lights add dazzle and theatricality to your animation.**  
**Volume lights create the effect that the atmosphere has an amount of fog.**  
**Volume lights can be any color and add drama to a scene.**

1. First create a simple set up with a teapot and a plane.

2. Find "lights" on the create menu

3. Use a "Standard-Target Spot"

4. Click "Add" in the Atmospheres & Effects" panel

5. Select "Volume Lights"

6. Select "Set Up" to make adjustments to your light. You change the fog (volume) color, the thickness of the fog, etc..
